

## Dedicated Internet access

### Providing Kansas carriers with low-cost, reliable connectivity

With upload and download speeds of 10 Mbps–100 Gbps, KsFiberNet's dedicated Internet access (DIA) enables service providers to better respond to the needs of their customers. Superb customer service, proactive network monitoring and multiple upstream Tier 1 providers ensure a reliable, efficient, high-performance network.

### Industry-leading technology

KsFiberNet's DIA is based on best-in-class transport and routing platforms, so KsFiberNet ensures that connections to the Internet are reliable and optimally routed through interconnection arrangements with multiple Tier 1 Internet providers in Wichita and Kansas City.

### Dedicated peering

KsFiberNet provides low latency and improved performance through dedicated peering connections with multiple content delivery networks (CDNs), including:

- Facebook
- Google
- Hurricane Electric
- KanREN
- Microsoft
- Netflix

### Standard product features

- Geographically diverse Tier 1 interconnections
- IPv6-ready
- Flexible electrical or optical Ethernet handoffs
- Peering arrangements with 17 CDNs (and growing)
